Oct 2023 – Aug 2027

B.Tech -Computer Science and Engineering - CGPA - 7.5

Noida, Uttar Pradesh

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js , Bootstrap, EJS

Backend: Node.js, Express.js, MongoDB

Developer Tools: Git, Postman, VS Code, Socket.IO

PROJECTS

E-commerce Web Application | MEN Stack(MongoDB,Express,Node.js, EJS)

Jan 2025 – Feb 2025

- Built a feature-rich e-commerce platform with password reset functionality to help users securely regain access without needing admin assistance. Integrated high-resolution product preview with zoom-in effects, improving user interaction and purchase confidence on product pages.
- Delivered a highly responsive UI and seamless navigation across home, product, and cart pages, enhancing overall shopping experience. Enabled authenticated users to leave reviews and ratings on products, creating a community-driven feedback system.
- Developed admin-only dashboard to add, edit, or delete product listings with proper access control and validation. Implemented a dynamic shopping cart system allowing users to add/remove items, update quantities, and view total cost in real time.
- Integrated order confirmation and alert notifications to keep users informed throughout the purchasing process. Used MongoDB for efficient product and user data storage with Mongoose validation ensuring data integrity.
- Added wishlist functionality enabling users to bookmark favorite products and revisit them for future purchases. Implemented a secure checkout workflow with step-by-step cart review, shipping detail input, and order confirmation.

Connectify – Real-Time Chat Application | MERN + Socket.IO

Mar 2025 – Apr 2025

- Developed a real-time chat application enabling users to initiate one-on-one or group conversations with persistent history using MongoDB and Clerk-based authentication for secure session management.
- Integrated WebSockets via Socket.io to allow live message exchange without page reload, ensuring low-latency communication and real-time updates in an intuitive interface. Implemented user presence indicators, typing status, and read receipts to enhance interactive experience and user engagement during active chats.
- Built admin functionality for moderating chats, managing users, and maintaining a clean and secure environment through role-based access control. Designed responsive layouts for all screen sizes and optimized state handling with React Query to fetch and update chats efficiently.
- Enabled message deletion, emoji reactions, and link previews to elevate the usability and social expressiveness of the platform. Deployed the application on Vercel and Render ensuring smooth CI/CD workflows and consistent uptime.
