Frontend: React.js, Next.js, Bootstrap, EJS

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, Mongoose

Developer Tools: Git, Postman, VS Code, Socket.IO

PROJECTS

GoTrip – AI-Powered Travel Booking Web Application | MERN Stack

Nov 2025 – Dec 2025

- Developed a smart travel booking platform that displays real-time data for **hotels, flights, and trains**, enabling users to compare options and redirect seamlessly to trusted booking partners.
- Built curated destination pages highlighting top travel locations across India and globally, helping users explore trips based on interest, budget, season, and travel style.
- Implemented an **AI-powered travel search engine** that allows users to discover destinations worldwide—including within their own city—using natural language queries.
- Engineered a **multilingual AI Trip Planner** capable of generating complete, day-wise itineraries tailored to user preferences such as budget, duration, group size, and travel goals.
- Added secure **PDF export** functionality enabling users to download and save their AI-generated trip plans for offline access or future travel reference.
- Designed an intuitive, modern, and mobile-responsive UI with smooth routing and optimized performance, ensuring seamless navigation across search, exploration, and trip-planning modules.

Connectify – Real-Time Chat Application | MERN + Socket.IO

Mar 2025 – Apr 2025

- Developed a real-time chat application enabling users to start **one-on-one** or **group conversations** with persistent message history using **MongoDB** and secure authentication via **Clerk**.
- Integrated **WebSockets (Socket.IO)** to support live message exchange without page reloads, ensuring **low-latency communication**, real-time updates, and smooth chat interactions.
- Implemented advanced features including **user presence indicators**, **typing status**, **read receipts**, and message timestamps to enhance engagement and deliver a modern messaging experience.
- Built **admin controls** for moderating chats, managing users, and maintaining a safe environment through **role-based access control**. Designed fully **responsive layouts** optimized for all devices.
- Added **message deletion**, **emoji reactions**, and **link preview rendering** to improve social expressiveness and user usability within conversations.
- Optimized state management using **React Query**, enabling efficient data fetching, cache synchronization, and smooth real-time updates across chats.

COURSEWORK/ SKILLS

- DSA
- Web Development

CERTIFICATIONS

- Mastering Full Stack MERN Development – Coding Blocks (Online)
